INTRODUCTION

The Planning Survey Division of the Montana Highway Department initially began truck weighing operations for statistical purposes in 1936. These studies were then discontinued until 1942 but since that time have been conducted annually. In order that a more direct year to year comparison of the various data may be made, the field work is scheduled so that each station is operated during the same hours on approximately the same dates each year. In this manner loading trends of commercial vehicles in Montana have been kept current for the ultimate use in highway design.

Rural station, Number 3 which was abandoned due to construction of I 90 near Laurel was re-opened in 1965. Trend data is now being reported on this station. Station Number 12 was abandoned due to the opening of I 90 at Missoula.

In 1967 12 stations were operated on various Secondary Highways throughout the state. No comparison could be made since this was the first year of operation.

Two graphs are included in the report. Number IV was taken from the W-3 Tables showing the average loaded weights of all trucks and all combinations from 1936 to 1967. Number V represents the increase in numbers and percent of all trucks and combinations taken from the W-1 Tables for four stations which could be compared from 1936 to 1967.

The following stations were operated during August and September of 1967:

<u>STATION NUMBER</u>	<u>DESCRIPTION</u>	<u>STATION NUMBER</u>	<u>DESCRIPTION</u>

Permissible Loads: No axle shall carry a load in excess of 18,000 pounds. An axle load shall be defined as the total load transmitted to the road by all wheels whose centers may be included between two parallel transverse vertical planes 40 inches apart, extending across the full width of the vehicle.

Permissible loads subject to the limitations in the above schedule of gross weights, in pounds, applies to distance in feet between the extreme axles of any group measured to the nearest foot. If a fraction is exactly one-half foot, the next largest whole number is used.
